# SANITIZER HANDS **H1**

**READY-TO-USE  
VIRUCIDAL RUB-IN HAND SANITIZER**

In regards to Hand Hygiene, IPC managers should never compromise on quality and always look for “tolerance for compliance”.

In addition to the multi-modal strategy from WHO, one of the keys to increase compliance in Hand Hygiene practices, and therefore reducing HAI, is to offer healthcare workers products which respect their skin, health, and environment. Saniswiss best-in-class ethanol-based rub sanitizer, is using organic molecules as the new choice of IPC leaders for hygienical and surgical hand sanitizer.

**TECHNICAL DATA**

**Composition**  
Bioethanol ( CAS n° 64-17-5 72% w/w), moisturizing agents and superfatting agents perfume-free, fragrance-free.

**Direction for use**  
For professional users, used on a dry, clean and healthy skin. do not rinse.

**Hygienic disinfection**  
rub with a min. of 3 ml, a hollow of hand, during 30 sec.

**Surgical disinfection**  
rub with a min. of 2 x 3 ml, a hollow of hand, during 2 x 45 sec.

Use biocides safely. Always read the label and product information before use.

Biocide PT1

**FULLY-VIRUCIDAL**

Fully virucidal and active on a wide range of pathogens incl. bacteria, fungus, yeasts and mycobacteria. Ideal on a routine base incl. during the Norovirus-season.

**MADE OF PLANT ORIGIN**

Our eco-friendly formulation features ingredients of organic origin such as bio-ethanol.

**RAPID**

Lethal for 99% of germs most within 15 sec. incl. non-enveloped virus. It provides good persistent activity after surgical disinfection.

**SKIN FRIENDLY**

Its hypoallergenic formulation features no allergenic substances such as fragrances, perfumes, paraben and phenoxyethanol. For additional safety, the liquid has been subjected to extensive dermatological tests.
